

Hello, My name is Bryson R. Adams, and I've been a TECH. licensed ham for about 2-2.5 yrs now. I was also an electronic technician-communications specialist in group 2 submarine fleet U.S. NAVY. As of August 17 2002 I passed my general license written exam. 6 months prior to that I started to study morse code. I practice 30 minutes a day every day, and still to this day. As of 17 AUG 2003 my CSCE for my general class license has expired, and still I study the code. I doubt that I'll ever study enough in my life time to pass the code test. You I'm not a dumb guy it's just that for some reason or another that I can't control my brain and my ears just don't recognize morse code. Believe me as a submarine radioman breaking digital, and other such electronic eaves dropping is a day in day out thing, morse code to me is an unbreakable barrier. This is why I urge the FCC. to adopt the no code HF. petition set forth by NCVEC. Why because I know that there are others out there like me. Whether because they have hearing loss, or the code just doesn't click. We too would like to talk around the world on HF band. SO please please take great consideration when making your decision.

Thank much,
Bryson R. Adams "KD7NWL"
